6	77656	ITP 205 Large Washer	1
7	488679	ITP 205 Replacement Wash Lever	1

When a teat is inserted into the milking inflation, these valves will automatically open, turning on the vacuum to the teat end, When the liner is removed, the valve will close. The ITP 205 has a manual lever for locking the valve in the open position for use during washing where the fluctuating vacuum level causes the valve to close inadvertently.
